ICNOOR-VIII

INTRODUCTION

Operations Research (OR) referred to the application of mathematics and other scientific methods in defense and tactical operations. Now OR is simply a scientific approach used in assessing the effectiveness of a system in terms of design and operation. Numerical Optimization (using mathematical models) is another scientific approach in finding the best solution to a particular problem. So, the combination of both approaches is crucial in the area of developmental work. Therefore, in 2015, the Journal of KALAM, an internationally refereed journal will organize the 8th International Conference on Numerical Optimization and Operations Research (ICNOOR-VIII) at Bukit Tinggi, Padang, Indonesia.

OBJECTIVE

- Provide a platform for researchers, professionals, academicians and creative laymen to exchange ideas and discuss their research findings.
- Provide ample and fertile ground for researchers to interact at a deeper level in a very harmonics atmosphere.
